Forces

<u>Prior Learning:</u> Force is strength or energy as an attribute of physical action or movement and a mechanism is a system of parts working together.

Concept - Physics - forces

Facts Vocabulary 1. Definition of a force: 1. Force - Middle English: from Old a) A force is any interaction that, when unopposed, will change French force (noun), forcer (verb), the motion of an object based on Latin fortis 'strong'. 2. The action from a force can cause an object to: a) move or speed up (accelerate) b) to slow down (decelerate) c) to stop d) to change direction. Types of forces: Gravity 3 a) Gravity - the force by which a planet or other body draws rbit of the Moon objects toward its centre. The Earth's gravity is what keeps you on the ground and makes things fall. pull of the Moon and b) Air resistance - describes the forces that are in opposition to the motion of an object as it passes through the air thus Earth slowing the object down. c) Water resistance – A force that is cause by water with the Air resistance force acting in the opposite direction to an object moving gravity that changes path of the Moor through the water. d) Friction - the resistance that one surface or object encounters when moving over another. Balanced and Unbalanced forces: Upthrust of the water a) Balanced forces do not cause a change in motion. b) Unbalanced forces cause a change in the motion of an object. Simple machines that allow a smaller force to have a greater effect: a) A lever - a rigid bar resting on a pivot, used to move a heavy or firmly fixed load with one end when pressure is applied to the other. Balanc Weight of the boat b) A pulley - a wheel with a grooved rim around which a cord passes, which acts to change the direction of a force applied to the cord and is used to raise heavy weights. c) A gear - a toothed wheel that works with others to alter the speed of a driving mechanism and the speed of the driven parts 6. Unit of measurement for forces: a) Newtons (N) 7. Scientists who helped develop gravitational theory: a) Galileo Galilei b) Isaac Newton Websites:https://www.bbc.com/bitesize/topics/znmmn39 https://www.schoolsofkingedwardvi.co.uk/ks2-science-year-5-5bforces-gravity/ https://www.schoolsofkingedwardvi.co.uk/ks2-science-year-5-5cforces-simple-machines/
