Alderman Bolton Newsletter

This week in Class...

In 1/2A this week we have been continuing our non-fiction writing all about reindeer. We've learnt that reindeer live in cold climates such as Russia and Alaska, they eat moss, ferns and berries and they're covered in hair from their noses to their toes!

In Maths we have been solving division problems and learning about 2D and 3D shapes. We have been making up our own problems for equations such as $20 \div 5 = 4$...ask us to tell you one!

We completed an investigation to find out which materials were magnetic. We found out that metals are magnetic, but aluminium isn't.

Some 'Magic Pencils' have flown into our classroom this week and changed our handwriting for the better. It's now even neater than some of the adults in school! "The magic pencil makes me write my letters really tall!" – Dylan Whitfield. Many children have reached the 'GOLD' STAR' this week...keep up the hard work 1/2A!

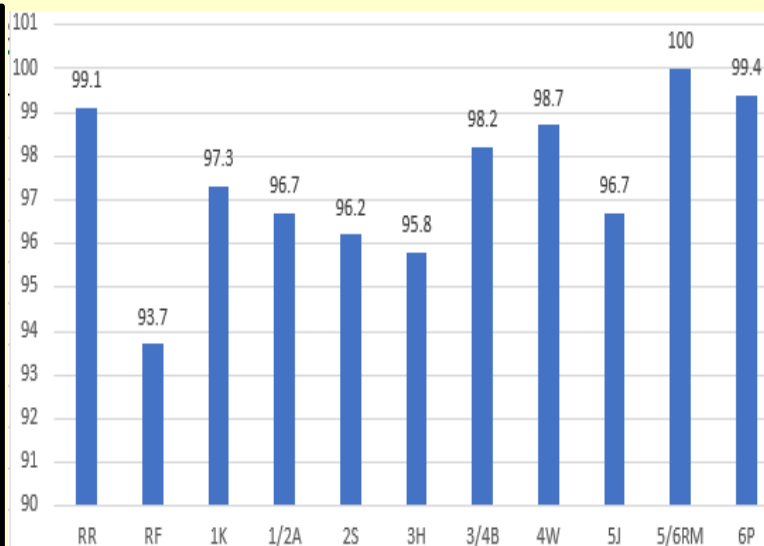

In science this week 1K have been investigating using magnets! We discovered that magnets have a South Pole and a North Pole and that opposites attract! The children created their own hypothesis before testing out the magnets.

Lola Griffiths "I think that the magnets will attract all things metal"

Bobby Fisher "I think that the magnet will repel all things wooden"

The children then went on to prove/disprove their own hypothesis with reasons why the magnets attracted or repelled certain materials.

Attendance

Congratulations to class 5/6RM who had 100% attendance last week. A fantastic start to 2019!

The overall attendance was 97.4% which is above the national average.

Keep up to date with all of the exciting events and activities taking place over the coming weeks by following us on Twitter @ABCPSchool.
